A Short Story

Accuracy in abstracts.
Promptness in loans.
Perfections of titles.
Reasonableness of rates.
Leniency of terms.

That's all—but it is better than a long tale that would fill a volume. You can't beat it. We only ask for an opportunity to prove it.

Alum baking powders are detrimental to health.

Many consumers use alum baking powders in perfect ignorance. They are allured to the danger by the cry of cheapness, and the false and flippant advertisements in the newspapers. Alum baking powders do not make a "pure, wholesome and delicious food" any more than two and two make ten. Their manufacturers are deceiving the public.

If you wish to avoid this danger to your food,

LOOK UPON THE LABEL

and decline to buy or use any baking powder that is not plainly designated as a cream of tartar powder.
